

Sarah Anti-Proliferation Week

April 1 - April 7

CELEBRATE BY LEGALLY CHANGING YOUR NAME!

Did you know???

- 99% of human beings know a person named Sarah, *or maybe even more?* [1]
- 12% of the state of Arkansas *alone* is named Sarah. (*Without counting the men!!!*) [2]
- "Sarah" can be spelled without an "h," but it is the same really.
- Percentage-wise, at least half of all Sarah's in the world will be hurt in a motor vehicle accident as a child, if not properly strapped in.
- It is predicted that as many as a hundred children are born every second named Sarah. [3]
- ***As many as 50 people and animals are injured or killed each year due to what a scientist would call "Sarah Saturation," a phenomenon that occurs when someone yells "Sarah!" and there is more than one Sarah and somebody gets badly confused. They are injured or killed by cars, trains, planes, bats (**both kinds**), helicopters, and by other people.***
- **You CAN help!**

If you know a Sarah or are on, help celebrate Sarah Anti-Proliferation Week by changing your their/name to a less hazardous one (Paisley, Tisiphone, etc.)! You can do this at your local courthouse or possibly at the post office! May need to call ahead

[1] Not counting the people who may or may not be in the other countries, countries such as Spain.

[2] There are not very many men with this name.

[3] it is predicted by Nostradamus
